A SPECIAL OFFERING OF SWEDISH COMMEMORATIVES

Most Swedish commemoratives are concerned with celebrations of political freedoms or events of the Royal family. Swedish commems rank high in artistic merit; their characteristic simplicity of design and excellence of portraiture are renowned. All were minted at the Royal Mint in Stockholm.

These silver commemoratives have proven to be an excellent investment in the past and every indication is that they will continue to appreciate in value at a steady rate. We offer below a complete Yeoman type set in either AU-UNC or CHOICE BU:

WE APOLOGIZE FOR THE DELAY IN OUR FIRST PAPER MONEY LIST which has been delayed due to factors beyond our control. We are still working on it, and hope to have it published in either December or January. In the meantime, we welcome want lists for paper money of individual Latin American countries.

AS EVERYONE IS AWARE, all gold coins will be legal to own in the USA as of January 1, 1975. We will be supplying late-date Latin American gold coins at that time at competitive prices. If you are interested in purchasing these gold coins, please let us know.

GOLD COINS OF THE WORLD

This offering constitutes another nice group of numismatic gold featuring the issues of Latin America. It is now over one year since we became actively involved in this field. Most scarce issues have doubled or tripled in value albeit some minor denomination issues of the early republic era of Latin America have not increased to any significant degree

It is worthwhile to note that comparatively few of the 1000 - 1500 pieces we have handled were in that area. We suspect these items are quite undervalued on the present market.

Regarding grading, the evaluation of the state of preservation of a coin, we feel the need to comment on the international disparity in standards for gold coins. Classical European standards are at least one full grade stricter than those normally employed in the USA. Until this present price list, we graded our gold pieces in accord with the more liberal USA standards, since the majority of our clientele are more familiar with the USA standards. Beginning with this list, however, we have changed to the same conservative, European standards we have been using for grading our silver coinage. Consequently, many of these pieces will appear to be undergraded upon inspection by domestic collectors.

MINOR COINS OF THE WORLD

RUSSIA

THE ROBERT HARRIS COLLECTION

THE FOLLOWING GROUP of Russian coins consists largely of selected pieces from the ROBERT HARRIS collection. Mr. Harris is the author of the standard reference on Russian coins, A GUIDEBOOK OF RUSSIAN COINS, 1725 - 1972. This is easily the finest selection of Russian coins we have ever offered. In the past two years, we have found it particularly difficult to locate scarce and interesting Russian coins.

The sale of Mr. Harris' collection represents an unusual opportunity for the collector to obtain several scarce items at one time. The second edition of Mr. Harris' catalog has recently been released with revised pricing by John Mevius. As a service to our collector clientele, we can offer this important second edition for \$7.50 postpaid.
